

# Efficacy of distant healing - a four armed randomized study

## Informationsblatt

### Projektinformationen

EUHEALS

ID Finanzhilfvereinbarung: QLG4-CT-2000-00550

Startdatum  
1 Februar 2001

Enddatum  
31 Juli 2004

Finanziert unter  
FP5-LIFE QUALITY

Gesamtbudget  
€ 556 752

EU-Beitrag  
€ 300 000

Koordiniert durch  
**UNIVERSITAETSKLINIKUM  
FREIBURG**  
 Deutschland

## Ziel

Little is known about distant healing, an alternative treatment. Patients suffering from multiple chemical sensitivity (MCS), chronic fatigue syndrome (CFS), or functional memory disorder (FMD), who have no clear treatment option are controlled trial of distant healing in 400 patients. They will be randomised to

- receive healing and know this,
- receive healing without knowing,
- Wait and know this and
- wait without knowing. Study target will be health related quality of life (SF36) after 6 months of treatment/waiting. Patients will be enrolled by environmental clinics and treated by healers all over Europe. We thereby expect to provide information for an evidence-based decision of regulatory and reimbursing authorities.
